

ENDOCRINE MODULE

MBBS Year-2 (Academic Year 2019-2020)

KMU Central Curriculum Committee Khyber Medical University, Phase V, Hayatabad | Peshawar

Table of Contents

List of Themes	. 2
Learning objectives	. 2
Theme-1 (Tall stature)	. 2
Embryology	2
Histology	2
Physiology	2
Biochemistry	3
Medicine	4
Neurosurgery	4
Pediatrics	4
Theme-2 (Neck swelling with bulging eyes and Tetany)	. 4
Gross anatomy	4
Embryology	4
Histology	4
Physiology	4
Biochemistry	5
Medicine	5
Pharmacology	6
Community medicine	6
Theme-3 (Increased thirst and urination)	. 6
Histology	6
Physiology	6
Biochemistry	6
Pharmacology	6
Medicine	7
Theme-4 (Moon face)	. 7
Gross anatomy	7
Embryology	7
Histology	7
Physiology	7
Biochemistry	7
Medicine	8
Practical work	. 8
Biochemistry	8
Histology	0

List of Themes

TOTAL WEEKS-4

Themes	Duration in weeks
Tall stature	1 week
Neck swelling with bulging eyes / tetany	1 week
Increased thirst and urination	1 week
Moon face	3 days

Learning objectives

At the end of this module, the 2nd year students will be able to:

- 1) Development, structure, hormones and regulation of pituitary gland, thyroid gland, parathyroid gland, endocrine pancreas, and adrenal glands
- 2) Describe the etiology, pathophysiology, relevant clinical features and common investigations of disorders of these glands
- 3) Describe the basic concepts and components of medical professionalism
- 4) Describe the steps of writing a research proposal

Theme-1 (Tall stature)

Subject	Topic		Learning objectives
Embryology	Pituitary gland	1	Describe the development of Anterior
			and posterior pituitary gland
Histology	Pituitary gland	2	Enlist the histological differences
			between anterior and posterior
			pituitary glands
Physiology	Introduction to	3	Describe the chemical messengers in
	endocrinology		the body
		4	Describe the classification of hormones
		5	Describe mechanisms of synthesis of
			hormones
		6	Describe mechanisms of hormone
			Secretion, Transport and Clearance
			from the Blood
	Mechanisms of	7	Explain mechanisms of Action of
	Action of Hormones		Hormones
		8	Describe second messenger
			mechanisms for mediating intracellular
			hormonal functions

		9	Describe measurement of Hormone
			Concentrations in the Blood
	Pituitary gland	10	Concentrations in the Blood
	Physiological	10	Describe physiological anatomy of
	anatomy and its		pituitary gland
	control		pituitary gianu
	CONTROL	11	
		11	Describe hypothalamus Control of
			Pituitary Secretion
			Treatedly Secretion
	Physiological	12	
	Functions		Describe Growth hormone's effect on
	of Growth Hormone		growth and metabolism
		13	Explain the structure, mechanism of
			action and physiological effects of
			Insulin-Like Growth Factors
		14	Describe regulation of Growth
			Describe regulation of Growth Hormone
	Physiological	15	Describe formation and physiological
	Functions		functions of Oxytocin
	of Posterior Pituitary		
	hormones		
		16	Describe formation and physiological
			functions of ADH
Biochemistr	Hormones	17	Define hormones and differentiate
У	Introduction		between the terms- endocrine,
			paracrine & autocrine
		18	Classify hormones on various basis
		19	Discuss the mechanisms of action of
			hormones
		20	Define 2nd messengers and their roles
	Anterior Pituitary	21	Enumerate the hormones of anterior
	hormones		pituitary gland
		22	Describe the chemistry, secretion,
			mechanism of action, regulation and
			metabolic effects of Growth hormone
			with its related clinical disorders
	Posterior Pituitary	23	Enumerate the hormones of the
	1	i	

		24	Describe the chemistry secretion
		24	Describe the chemistry, secretion,
			mechanism of action, regulation and
			metabolic effects of the hormones of
			the posterior pituitary gland with its
			related clinical disorders
Medicine	Acromegaly	25	Describe the pathophysiology, clinical
			features and investigations of patient
			with Acromegaly and Gigantism
		26	Describe the etiology, clinical features
			and investigations of a patient with
			diabetes insipidus
Neurosurge	Tumors of pituitary	27	Explain the types, clinical features, CT
ry	gland		and MRI findings and management of
			pituitary tumors
Pediatrics	Growth charts	28	Describe the fundamentals of growth
			charts in pediatric practices
Theme-	2 (Neck swelling	with	n bulging eyes and Tetany)
Gross	Thyroid gland	29	Describe the gross structure, lobes,
anatomy			relations, bold supply, venous drainage,
			nerve supply and lymphatic drainage of
			thyroid gland
Embryology	Thyroid gland	30	Describe the developmental events and
, 3,			anomalies of thyroid gland
	Parathyroid gland	31	Describe the developmental events of
			parathyroid gland and its anomalies
Histology	Thyroid gland	32	Describe the microscopic structure of
Thistology	,. e.a g.aa		thyroid gland
Physiology	Introduction of	33	Describe formation, Secretion and
Filysiology	thyroid hormones		transport of thyroid hormones
	anyroid normones	34	Explain mechanism of action of thyroid
			hormones
		35	Explain the actions of thyroid hormones
		33	on cellular metabolism
	Physiological	36	
	Physiological	30	Describe Physiological effects of
	functions		Thyroid Hormone on Growth,
	®ulation of		metabolism and body systems
	thyroid hormone		
		37	Describe Regulation of Thyroid
			Hormone Secretion

	Physiological functions and Control of the Parathyroid hormone	38	Explain Mechanism of action PTH
		39	Describe Effect of Parathyroid Hormone on Calcium and Phosphate concentrations
		40	Describe Control of Parathyroid Secretion
	Physiological role of VIT D and Calcitonin in Calcium metabolism	41	Explain Role of Vit. D in Calcium and phosphorus metabolism
		42	Explain physiological functions of calcitonin
Biochemistr y	Thyroid gland	43	Enumerate the hormones secreted from thyroid gland
		44	Describe the chemistry, biosynthesis, secretion, mechanism of action, regulation and metabolic effects of thyroid hormone and calcitonin with its related clinical disorders
	Parathyroid gland	45	Enumerate the hormones secreted from parathyroid gland
		46	Describe the chemistry, biosynthesis, secretion, mechanism of action, regulation and metabolic effects of parathyroid hormone with its related clinical disorders
Medicine	Thyroid disorders	47	Explain the clinical features of hyperthyroidism
		48	Explain the clinical features of hypothyroidism

	T	T	
Pharmacolo	Antithyroid drugs	49	Describe the types and mechanism of
gy			action of Antithyroid drugs
Community	Diabetes mellitus	50	Describe the epidemiology, risk factors
medicine			and prevention of Diabetes Mellitus
-	"h 2 (l		deivet endinetien)
	,		hirst and urination)
Histology	Pancreas	51	Describe the histological features of
			pancreas and differentiate between
			exocrine and endocrine parts of
			pancreas
Physiology	Mechanism of	52	Explain Mechanism of action of insulin
	action of insulin &its		
	control		
		53	Describe the Control of Insulin
			Secretion
	Physiological Effects	54	Describe the effects of insulin on
	of insulin on		carbohydrates, proteins and Fats
	carbohydrates,		metabolism
	protein, and Fats		
	Physiology of	55	Describe regulation of glucagon and its
	Glucagon		effects
		56	Describe the physiological actions of
			Somatostatins
	Physiological effects	57	Describe Effects of hyperglycaemia
	of Diabetes Mellitus		/hypoglycaemia on body functions
		58	Explain Insulin resistance
Biochemistr	Pancreas	59	Enumerate the hormones secreted by
у			pancreas
		60	Describe the chemistry, biosynthesis,
			secretion, mechanism of action,
			regulation and metabolic effects of
			Insulin & Glucagon with its related
			clinical disorders
Pharmacolo	Antidiabetic drugs	61	Explain the mechanism of action of oral
gy			antidiabetic drugs
		62	Explain the mechanism of action and
			complications of Insulin therapy

Medicine	Diabetes Mellitus	63	Explain the short-term and long-term
Medicine			complications of Diabetes Mellitus
		64	Describe the pathophysiology, clinical
			features and treatment of Diabetes
			Mellitus
			Weineus
	Theme		oon face)
Gross		65	Describe the gross anatomy and
anatomy			relations of adrenal glands on both
			sides
Embryology	Adrenal gland	66	Describe the development of adrenal
			gland
Histology		67	Describe the microscopic picture of
-			adrenal gland and differentiate
			between the various histological zones
			of adrenal gland
Physiology	Physiological	68	Describe Types, Mechanisms and
, 0,	functions of		regulation of mineralocorticoids
	Aldosterone		
		69	Describe the physiological Effects of
			Aldosterone (Renal, Circulatory and
			others)
	Physiological	70	Describe Types and Mechanisms of
	Functions of the		Glucocorticoids actions
	Glucocorticoids		
		71	Describe Effects of Cortisol on
			Carbohydrate, Proteins and Fat
			Metabolism
		72	Describe role of Cortisol in Stress,
			Inflammation and Allergy
	Physiological	73	Describe ACTH Secretion & mechanism
	functions		of Action
	Adrenocorticotropic		
	Hormone ACTH		
Biochemistr	Adrenal cortical	74	Enumerate the hormones secreted
у	hormones		from adrenal cortex
-		75	
		/3	Describe biosynthesis, secretion,
			mechanism of action, regulation and metabolic effects of Adrenal cortical
			hormones with its related clinical
			disorders

	Adrenal medullary	76	Enumerate the hormones secreted
	hormones		from adrenal medulla
		77	Describe biosynthesis, secretion,
			mechanism of action, regulation and
			metabolic effects of Adrenal medullary
			hormones with its related clinical
			disorders
		78	Describe the structure and functions of
			Melanocyte-Stimulating Hormone,
			Lipotropin, and Endorphins
Medicine	Cushing's syndrome	79	Describe the clinical features and
			complications of Cushing`s syndrome
	Addison`s disease	80	Describe the clinical features and
			complications of Addison`s disease

Practical work

Biochemistry	Urinary glucose	81	Detect glucose in urine
	Blood glucose	82	Detect glucose in blood
	Glucose tolerance	83	Perform and interpret Glucose
	test		tolerance test
Histology	Pituitary glands	84	Identify the structure of pituitary gland
			under microscope
	Thyroid gland	85	Identify the structure of thyroid gland
			under microscope
	Adrenal gland	86	Identify the structure of adrenal gland
			under microscope
