Foundation Module I First Professional Year MBBS 6 Weeks

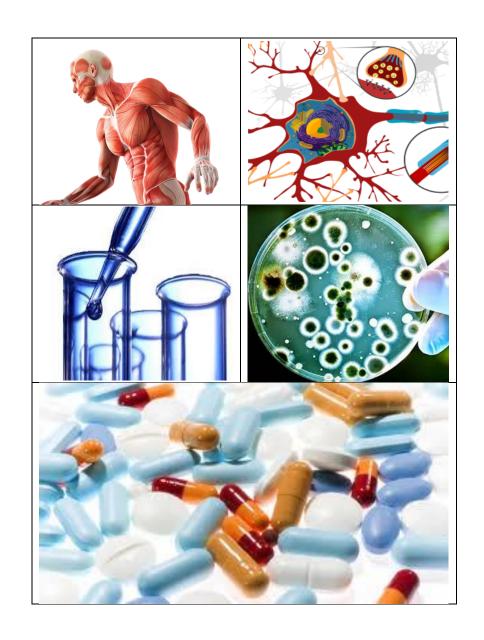

Table of Contents

General Learning Outcomes	4
Knowledge	4
Skills	4
Attitude	4
THEMES FOR FOUNDATION MODULE	5
THEME-I: Orientation	6
ANATOMY	6
PHYSIOLOGY	6
BIOCHEMISTRY	6
PATHOLOGY	6
PHARMACOLOGY	6
COMMUNITY MEDICINE	6
FORENSIC MEDICINE	6
MEDICAL EDUCATION	7
IT Skills	7
Library	7
THEME-II: CELL	8
ANATOMY	8
PHYSIOLOGY	8
BIOCHEMISTRY	9
PATHOLOGY	10
PHARMACOLOGY	10
LAB WORK	10
THEME-III: GROWTH & DEVELOPMENT OF HUMAN BODY	12
BIOCHEMISTRY	14
COMMUNITY MEDICINE	15
LAB WORK	15
THEME-IV: HUMAN BODY TISSUES, BONES & JOINTS	17
ANATOMY	
HISTOLOGY	

Foundation Module I

Physiology	18
Biochemistry	
PATHOLOGY	
FORENSIC MEDICINE	19
LAB WORK	19

General Learning Outcomes

By the end of this module the students would be able to;

Knowledge

- 1. Familiarize with the MBBS system-based curriculum
- 2. Recognize the role of different disciplines in studying human body and its diseases.
- 3. Describe the structure, function and biochemical composition of cell.
- 4. Describe the cell division, its types and genetic material along with its clinical correlation.
- 5. Describe the basic organization of human body.
- 6. Explain the maintenance of homeostatic mechanism.
- 7. Describe the various stages of pre embryonic human development and correlate them with various malformations.
- 8. Describe the importance of buffer and PH system.
- 9. Describe various cellular adaptations during cell growth, differentiation and cell injury.

Skills

- 1. Describe the basic laboratory techniques and use of microscope.
- 2. Follow the basic laboratory protocols.
- 3. Perform biochemical analysis of carbohydrates.

Attitude

- 1. Follow the basic laboratory protocols.
- 2. Participate in class and practical work efficiently.
- 3. Maintain discipline of the college.
- 4. Follow the norms of the college properly.
- 5. Communicate effectively in a team with colleagues and teachers.
- 6. Demonstrate professionalism and ethical values in dealing with patients, cadavers, colleagues and teachers.
- 7. Communicate effectively in a team with colleagues and teachers.
- 8. Demonstrate the ability to reflect on the performance.

THEMES FOR FOUNDATION MODULE

SNO	Theme	Duration
1	Orientation	1 week
2	Cell	1 week
3	Growth & Development of Human Body	2 weeks
4	Human Body tissues, bones & joints	2 weeks

THE	ME-I: Orientation		
SNO	Topic	Learning Outcomes	
ANA	ГОМҮ		
1	Anatomy and its	Define anatomy and its branches	
1	subbranches	Describe purpose of study of anatomy and its branches	
PHYS	SIOLOGY		
2	Physiology and its	Enumerate the branches of physiology	
2	subbranches	Liturnerate the branches of physiology	
BIOC	HEMISTRY		
	Introduction to	Define biochemistry	
3	biochemistry and its	Discuss the role of biochemistry in medicine.	
	implication in medicine		
PATH	HOLOGY		
		Define pathology	
	Introduction to	Enumerate the different branches of pathology.	
4	pathology and its	Identify different sampling and processing techniques in	
	implication in medicine	different branches of pathology.	
PHAF	RMACOLOGY		
	Introduction to		
5	pharmacology and its	Define pharmacology and role of pharmacology in medicine.	
]	role in modern	Define the pharmaco dynamics and pharmacokinetics	
	medicine		
COM	MUNITY MEDICINE		
	Introduction to	Describe Role of community medicine/public health in health	
6	community Medicine	care system.	
	and its implication		
FORE	FORENSIC MEDICINE		

	Introduction to	Define Forensic Medicine, forensic pathology and state
	Forensic Medicine and	Medicine.
	Toxicology	Identify the Branches of Forensic Medicine.
7		Describe the History of Forensic Medicine.
/		Discuss the scope of Forensic Medicine.
		Identify the essential facilities for medico legal investigation.
		Define Medical Jurisprudence (not included for assessment in
		foundation module first year MBBS)
8	Pakistan Medical	Describe the structure and functions of Pakistan Medical
0	Commission, Consent.	Commission.
MED	ICAL EDUCATION	
	Curriculum structure	Discuss the curriculum and modules.
	Teaching learning	Describe the use of study guides. (not to be assessed)
9	strategies	Differentiate between various teaching & learning strategies.
		Enlist various assessment tools & assessment policy. (Not to
		be assessed).
IT Sk	cills	
10	Importance of IT skills	Define IT and its importance
	MS word skills	Prepare the assignment on MS word
11	PowerPoint skills	Prepare the presentation on power point
	Excel sheet	Use the excel sheet
Libra	ary	
12	Literature search and	Literature search skills
12	library resources	
	•	

THEM	THEME-II: CELL		
SNO.	Topic	Learning Outcomes	
ANATO)MY		
	Cell structure and its	Describe the cell as a living unit of body	
13	Organelles	Describe the structure of cell and its organelles.	
15		Describe the structure of cytoplasmic organelles of the cell &	
		correlate it with their functions.	
14	Nuclear structure &	Describe the structure of the nucleus, nucleolus &	
14	components	chromosome and their functions in cell integrity.	
15	Cell division	Explain the process of cell division.	
13	Mitosis	Describe mitotic cell division with its stages.	
		Explain the process of Meiosis	
	Meiosis	Describe karyotyping.	
16		Explain the non-disjunction of chromosomes.	
		Correlate the process of non-disjunction with chromosomal	
		abnormalities	
PHYSIC	PHYSIOLOGY		
		Explain Intra cellular and extra cellular environment.	
17	Cell membrane	Correlate cytoplasmic organelles with their functions.	
	physiology	• •	
		Define homeostasis.	
18	Homeostasis	Describe the Homeostatic mechanism of major functional	
		systems.	
		Describe the characteristics of control systems with examples	

		Define membrane potential
19	Membrane potential	Describe ionic conc. differences across cell membrane
		Explain the Nernst equation.
		Explain origin of normal resting membrane potential
20	Movements of cell	Explain the amoeboid movement of cells.
20		Describe the ciliary movements
		Explain the role of voltage gated Na+ and K+ channels in
21	Depolarization &	action potentials.
21	Repolarization	Discuss the changes in conductance of Na and K channels with
		changes in membrane potentials
ВІОСН	EMISTRY	
	Biochemical	Explain the Bio-chemical composition of cell organelles and
	structure of cell	cytoplasm
22	Biochemical	Describe the chemical structure of mitochondrial membrane.
22	structure of	Explain the biochemical importance of mitochondrial
	Mitochondria	membrane.
	Nuclear membrane	Describe Bio-chemical structure of nuclear membrane and its
23		functions.
		Define and explain nucleotides and nucleosides.
	RNA & DNA	Describe the components of nucleotides
24		Describe the functions of Nucleotides
		Describe the types of nucleic acids
		Differentiate between RNA and DNA
25		
		Define Buffer and its role in maintenance of body PH
26	Buffer	Define colloidal state and Henderson Hasselbalch equation.
		Define adsorption and how it occurs.
<u> </u>		

		Evnlain ion evchange resin
		Explain ion exchange resin
	Cellular membrane	Explain membrane transport.
	transport	Discuss passive diffusion, active transport, and facilitated
27	mechanism	transport via a channel or carrier.
		Describe and evaluate the role of ion gradients, co
		transporters, and ATP in active transport mechanisms.
PATHO	LOGY	
		Describe the various causes of cell injury.
28	Cell injury	Describe the response of a normal cell to stimuli.
20		Describe the mechanisms of cell injury.
		Describe the different types of cellular adaptations.
PHARM	ACOLOGY	
	Routes of	
29	administration of	Enlist the route of administration of a drug.
	drugs	
	Transmembrane	Explain how drugs are transported across cell membrane and
30	drug transport	factors affecting it
	Receptor and	Enlist the types of drug receptors
	cellular basis	
31		
LAB W	ORK	
	The Microscope	Identify parts of microscope.
32		Demonstrate operation of microscope.
32		Describe the method of focusing slide at different
		magnifications.
L	1	1

Foundation Module I

		Follow the specified norms of lab work.
33	Lab Equipment	Introduction to lab techniques
33		Identify the equipment used in lab work
	PH and buffer	Define normal solution
	solutions	Define standard solution.
34		Prepare 0.1N solution of NaOH.
		Prepare 0.1N solution of HCL.
		Measure the PH of given solution (practical).

THEM	E-III: GROWTH &	DEVELOPMENT OF HUMAN BODY
SNO	Topic	Learning Outcome
	Introduction to	Describe the developmental stages.
35	Embryology	Describe the embryologic terminology.
		Explain significance of embryology.
		Describe the process of spermatogenesis.
	Spermato-Genesis	Differentiate between spermiogenesis and
36		spermatogenesis.
		Describe the morphological changes during maturation of
		gametes.
37	Oogenesis	Describe oogenesis and its correlation with meiosis.
37		Compare the male and female gametes.
	Transport Of Gametes	Explain the transport of gametes.
38		Describe the transport of sperms.
30		Describe the oocyte transport.
		Explain the maturation of sperms.
	Female reproductive	Describe the ovarian cycle.
39	cycle	Discuss the process of follicular development
39		Explain the process of ovulation.
		Correlate ovulation with the phases of menstrual cycle.
	Fertilization –Events	Define fertilization.
		Describe the process of fertilization.
40		Explain assisted reproductive technologies like In-vitro
		fertilization (IVF), assisted IVF and intra cytoplasmic sperm
		injection (ICSI).

	Fertilization –Clinical	Discuss the clinical correlation of the fertilization.
41	Correlates Cleavage &	Describe the process of cleavage of zygote.
41	Blastocyst Formation	Discuss the formation of blastocyst.
		Summarize the events of first week of development.
	Implantation & Its	Describe the process of implantation.
42	Abnormalities	Enumerate the sites of implantation.
42		Explain the clinical correlations of the implantation
		process.
	Amniotic cavity	Describe the formation of amniotic cavity
42		Describe the development of embryonic disc
43		Describe the development of umbilical vesicle.
		Explain the development of Chorionic sac.
	Events Of 2 nd Week of	Summarize the events of second week of development.
44	Development	Explain the clinical correlates of the second week of
		development.
45	Formation of Notocord	Explain the process of formation of Notocord
	Events of 3rd Week of	Describe the process of gastrulation.
46	Development	Explain the process of Neurulation.
40		Explain the development of somites.
		Describe the development of intra-embryonic coelom.
	Derivatives of germ	Describe briefly derivatives of germ layers
47	layers	Ectoderm
47		Mesoderm
		Endoderm
	Further development	Describe the process of development of Trophoblast and
48	of Trophoblast and	neurulation
	Neuralation	

embranes
f folding of embryo
weeks of development
cids.
oases.
f acids and bases in our
normal balance and
vapor pressure, normal
vapor pressure, normai
their Bio-chemical
chemical structure.
monosaccharides. e.g.
extrose.
/V infusion.
erebral edema.
arides and
f of f

	T	
51		Relate the structure of polysaccharides with its clinical
		importance.
	Carbohydrates -III	List the functions of carbohydrates in cell membrane,
		energy provision and nutrition supply to different parts of
		body.
COMMU	NITY MEDICINE	
	Determinants of	Define health
52	health	Describe the Determinants of Health
		Describe Spectrum of Disease
F2	Disease causation	Explain Natural History of Disease
53		Explain Theories of Disease Causation.
		Differentiate between Disease Elimination and Eradication.
54	Chain of infection	Describe reservoirs of infection & chain of infection
55		Discuss /describe Levels of Prevention
55	Levels of prevention	
LAB WO	DRK	
		Explain the process of sterilization
56	Sterilization	Enumerate the different methods of sterilization
		Observe the process of autoclaving in the laboratory
57	Capillary Blood	Obtain capillary blood sample for hematological
	Sampling	investigations through prick method
		Identify the sites for obtaining blood sample with different
		methods and list the indications for their use.
	Detection of	Define Monosaccharide's
58	Monosaccharide's	Discuss structure and types
		Perform the sequence of tests to identify the
		monosaccharides in a given solution.
<u> </u>		

Foundation Module I

59	Detecting of Reducing	Define reducing sugars, types.
	and non-reducing	Discuss structure and types of reducing sugars
	Sugars	Perform Benedicts test
60	Detection of	Define Polysaccharides.
	Polysaccharides in a	Discuss structures and types of Polysaccharides
	given Solution	Perform the sequence of tests to identify the
		polysaccharides in a given solution.

THEME-IV: HUMAN BODY TISSUES, BONES & JOINTS				
SN0	Topic	Learning Outcome		
ANAT	OMY			
61	Organization of human body	Describe the levels of organization of human body		
62	Anatomical terms	Describe the anatomical terms for planes, position and movements		
63	Classification of Bones	Describe the structure and function of bone Classify bones on the basis of length and shape. Identify the markings on bone		
64	Cartilage	Describe cartilage Classify the types of cartilage Describe the types of cartilages		
65	Introduction to Joints	Classify joints on the basis of structure. Describe the mechanism of movements of joint		
66	Muscles	Describe various muscle types along with structure.		
67	Skin / Integumentary system Skin (dermis & epidermis) Skin creases, Nails, Hairs, Glands (Sebaceous &	Discuss the anatomical structures of Skin /		
	sweat)	Integumentary system		
68	Lymphatic system	Describe the lymphatic system. Explain the functions of lymphatic system Describe the organization of lymphatic system Explain the mechanisms for the movement of lymph in the body.		
69	Nervous system Divisions (central & peripheral and somatic & autonomic)	Define the organization of nervous system Describe the divisions of nervous system Describe the formation of spinal nerve and concept of dermatome and myotome Describe the formation of nerve plexus.		
70	Autonomic Nervous system Sympathetic. parasympathetic nervous system	Describe the organization of autonomic nervous system Differentiate between sympathetic and parasympathetic nervous system on the basis of structure.		
71	Membranes: Mucous membranes, Serous membranes	Describe the structure of membranes of human body		
72	Fascia, ligaments and raphe	Describe the anatomy and significance of fascia, ligaments and raphe.		
73	Radiological anatomy	Identify various anatomical landmarks on radiography. Describe commonly used radiographs.		

		Describe various view used for obtaining radiographs.			
HISTOI	HISTOLOGY				
111510	Basic Body tissue				
	Definition of tissue				
	Epithelial tissue	Define tissue			
74	Connective tissue	Describe the basic tissues in human body			
	Muscular tissue	,			
	Nervous tissue				
	Epithelial tissues	Classify epithelium			
	Classification of	describe the general features of epithelium			
75	epithelium	explain the specialized functions of different types of			
75	General characteristics	epithelial cells			
	and Functions of	Describe the structure of main types of cell junctions			
	epithelium				
		Enlist glandular epithelia			
	Glandular Epithelium	Classify them on the basis of morphology, nature of			
76		secretion and mode of secretion			
'		Differentiate between exocrine & endocrine glands on			
		the basis of structure and function.			
	Epithelial Cell Surface	Describe the surface specialization of epithelia			
77	Specialization	Correlate their structure, with their location and			
//	Specialization	function			
	Structure & Function of	Describe the structure of basement membrane &			
78	Basement Membrane	correlate it with its function.			
	Connective tissue	Define connective tissue.			
		Classify connective tissues.			
79		Explain the different types of Connective tissues			
Physiol	logy				
	Autonomic Nervous	Describe the functions of the autonomic nervous			
	system	system.			
80		Compare and contrast the functions of sympathetic and			
		para sympathetic nervous system.			
		Classify autonomic receptors.			
Bioche	mistry				
81	structure and function of	Describe the structure and function of GAGS and its			
01	GAGS	clinical importance			
PATHO	LOGY				
		Discuss the Process of necrosis			
82	Necrosis	Explain the process of apoptosis			
		Differentiate between apoptosis and necrosis			
83		Describe acute inflammation			
	Inflammation	Describe events of acute inflammation			
		Describe chronic inflammation			
		Differentiate between acute and chronic inflammation.			

FORENSIC MEDICINE			
		Define death.	
84	Death	Describe stages of death.	
		Describe medico legal importance of stages of death.	
LAB WORK			
O.F.	Tissue Processing	Describe the process of tissue processing for histo-	
85		pathological examination.	
	Anatomical terms	Demonstrate anatomical terms for planes, position and	
86		movements.	
80		Demonstrate standard anatomical position and its	
		application.	
87	H& E staining	Perform H & E staining of tissue slides under	
		supervision in the laboratory	
88	Simple Epithelia	Identify and describe simple epithelia under M/S.	
89	Stratified Epithelia	Identify and describe stratified epithelia under M/S.	
90	Glands	Identify different types of glands under M/S.	
91	Smear preparation	Prepare a blood smear.
